CHIMENKA GOODLUCK UCHECHI

Address: Proforce Defence Center, Ode Remeo, Ogun State, Nigeria| Phone: +234 9035044862
Email: chimenkagoodluck@gmail.com | Nationality: Nigerian | Language: English

https://github.com/chimenkagoodluck

Education

Clifford University Abia State, Nigeria

B.Sc. (Hons) Cybersecurity (CGPA: 4.78/5.00) Oct 2025

Final Year Project: Development of an AI-powered Digital Evidence Authentication System for Forensic Investigations. Supervised by Dr. Uzoaru Godson.

Degree Classification: First Class Honors

Research Interest

- Adaptive Incident Response for Autonomous Cyber Defense and Distributed Systems
- Distributed IoT, Cloud, and Mobile Systems security
- Cyber Physical system| AI in health | AI in cybersecurity | Intelligent security software development
- Cyber law, digital forensics, and cybersecurity governance

Research Experience

Dr. Obidinma Alozie's Research Lab Ogun State, Nigeria

Research Assistant (Part-time) Nov 2025- Now

- I assisted in the design and evaluation of machine-learning models for detecting security threats and anomalies in healthcare-related datasets, medical records, and hospital equipment.
- I contributed to data collection, preprocessing, and analysis, ensuring data integrity and compliance with ethical research standards.
- I supported experimental validation and documentation of research findings for academic dissemination and future publication.

Final Year Research Abia State, Nigeria

Principal Researcher Dec 2024- May 2025

- Built an AI-powered platform that verifies digital evidence with 90% accuracy, combining deep learning, NLP, and metadata analysis to detect document forgeries, deepfakes, and tampered data.
- Created a user-friendly system with Django, PyTorch, TensorFlow, and SQLite that automates evidence examination and produces clear, legally admissible reports for judicial use.

Dr. Chigozie Francis's Research Group Abia State, Nigeria

Research Assistant Sept 2022- March 2023

- Collected 100+ academic resources (papers, journals, books) on biometric security and biometric analysis, and organized them for literature reviews.
- Engineered a biometric authentication system by collecting and preprocessing thousands of fingerprint datasets, training models for precise user recognition, and integrating security measures to prevent unauthorized access and spoofing

Dr. Okechukwu Johnson's Research Lab Abia State, Nigeria

Research Assistant Nov 2021- Aug 2022

- Implemented sensor fusion techniques to enhance interpretability and coordination among multiple IoT sensors, improving real-time threat detection accuracy by 25%.
- Performed comprehensive literature reviews across AI in IoT and embedded systems in cars to support ongoing research and proposal development.

Publications

Chimenka Goodluck, Obioma D.C. (2026). Comparative Analysis of Lightweight Cryptography and Blockchain-Based Security Protocols for Mitigating Threats and Vulnerabilities in the Internet of Things,11(1), https://doi.org/10.51584/IJRIAS.2026.110100130.

Goodluck, C. (2026). EvidenceHub: A Cross-Modal Explainable Artificial Intelligence System for Automated Digital Forensic Evidence Authentication and Traceability. Submitted for Review.

Goodluck, C., & Victor, A. (2025). An Automated Ambulance Dispatch System using AI routing algorithms. In Progress.

Goodluck, C. (2025). A Critical Assessment of the Enterprise Security Framework and Cybersecurity Posture of Clifford University Medical Center: Challenges, Risks, and Recommendations for Improvement. Preprint.

Selected Scholarships, Awards, and Honors

Institutional Appreciation Award Oct 2025
Recognized for exceptional innovation, achievement, and professional certifications.

Dr. Otuza Outstanding Research of the Year Award Oct 2025
Awarded for exceptional research, innovations, and inventions.

Dean's Merit Award Oct 2025
Highest Cumulative Grade Point Average (CGPA) in the Cybersecurity program.

Leadership Excellence Award March 2025
Awarded to the student who has excelled in leadership and excellence in their administration

Engineer Uzoma Ogbonna's Research Grant ($200) Nov 2024
Secured funding for Artificial Intelligence implementation research.

Pioneer Leadership Award May 2024
Recognized as the founding Chairman of the Information Technology Skill Acquisition Program.

Selected Talks/ Presentations

- Guest Lecture Series, Justice Chamber, School of Law, Clifford University March 2025
  Understanding Digital Evidence within the Nigerian Legal Framework: Issues of Admissibility, Authenticity, and the Expanding Role of Digital Forensics in Modern Litigation
- Talk with an Expert Day, Nursing Student Association, Abia State Feb 2025
  Exploring the Integration of Artificial Intelligence and Emerging Health Technologies in Advancing Modern Nursing Practice
- Seminar Presentation, Department of Mathematics and Computer Science Nov 2024
  Applying AI in Network Security: Analysis, Triage, and Remediation Processes
- Micro Processor Lab Platoon Section Oct 2023
  Image Analysis with MATLAB: Exploring Extraction, Encoding, Color, and EXIF methods in Processing Images

Media Contributions

- TVC News Interview: Discussed my high-impact AI research and innovation that was trending at the state and national level. **(Oct 2025)**
- Apex-Magazines: 'Cyber Threats Beyond Yahoo: What Nigerian Businesses Should Watch Out For in 2025.' **(Sept 2025)**

Teaching Experience

Student Lecturer (Forensic Lab and Machine Learning Lab) Oct 2024-May 2025

- Designed and delivered hands-on lab modules on memory forensics and incident response, and also an Artificial Intelligence manual on machine learning and core concepts in deep learning, improving students' practical competency and lab performance.

Digital Forensic Club Coordinator Jan 2024- Aug 2024

- Trained and mentored 50+ students in memory, network, and cloud forensics, increasing their participation in departmental competitions and practical laboratory work.

Student Tutor (3 years) Nov 2021-Oct 2024

- Provided academic support to students from Accounting, Computer Science, Law, and Nursing Science, contributing to measurable improvements in exam performance and course understanding.

Leadership/Academic Experience

Chapter President, NACOS Sept 2024– Aug 2025

Established and served as the pioneer president of the Nigeria Association of Computing Students (NACOS), where I transformed the association into a tech hub for academic excellence.

Secretary, Student Academic Committee Jan 2025– June 2025

- Developed curriculum for student academic activities, including quiz programs, tutorial scheduling, culture/arts talent hunt, technology, creativity programs, and student debate competition.

Chairman, Information Technology Skill Acquisition Program Aug 2023– Oct 2024

- Coordinated programs and courses on photography, media creation, programming, data science, and AI, where students from various schools and faculties come together to acquire technological skills.

Professional Certifications/ Trainings

Diploma in Computer Networking (Distinction)- HiiT Plc, Lagos Sept 2024

Diploma in Ethical Hacking (Distinction) – Hands-on Institute of Technology Feb 2024

Professional Experience

ProForce Defense Ogun State, Nigeria

Digital Forensics/ Incident Response Investigator Aug 2025– Current

- Developed 4+ forensic workflow templates adopted by the investigative, litigation, and security operations teams.
- Investigated up to 20 devices supplied by the Nigerian police and the Economic and Financial Crimes Commission for investigative and prosecution purposes.
- Supported the AI team with datasets for in-house forensic projects, anti-malware projects, and banking fraud detection projects.
- Currently working on Dark Web intelligence and three real-time memory analysis modules for next-generation forensic tools.

Master Guide Schools Lagos State, Nigeria

Cyber Security Intern March 2023– Sept 2023

- Conducted 10+ in-depth vulnerability assessments and internal security audits, helping the school close 45% of critical security gaps.
- Installed, configured, and optimized enterprise-grade firewalls, reducing unauthorized access attempts by 40% and improving network reliability for staff operations.

Technical/ Research Skills

- Programming & Web: Python, JavaScript, HTML, CSS, Flask, Django, Firebase, Git, SQL, Supabase, Tkinter, PysimpleGUI, C++
- Research Skills: Statistical analysis, literature review, Hypothesis formulation, Machine learning model development, Dataset preprocessing/Feature engineering, Experimental design and evaluation, ML and cyber research, Forensic investigation, writing academic papers (APA, IEEE)

Selected Software Developed

- Secure voting software for election management, security-inspired voting, and efficient data handling

- An intelligent emergency medical service dispatch system using machine learning and reinforcement learning to optimize ambulance routing and resource allocation.
- AI-powered security monitoring and threat detection system that combines natural language processing, computer vision, and advanced analytics to identify, analyze, and respond to security threats in real-time.
- AI-Powered Digital Evidence Authentication System
- Biometrics Attendance Software
- Medical Threat Intelligence and risk assessment software

Affiliations/ Professional Memberships

- Abia State Python Club (PyAbia) July 2025
- Nigeria Association of Computing Students (NACOS) Feb 2022
